

REDUCE
operating costs

IMPROVE
energy efficiency

REDUCE
carbon emissions

NYSERDA offers energy audits to help eligible farms and on-farm producers identify ways to save energy and money on utility bills. Reports include recommendations for energy efficiency measures.

Eligibility

Eligible farms include but are not limited to dairies, orchards, greenhouses, vegetables, vineyards, grain dryers, and poultry/egg. The farms must also be customers of New York State investor-owned utilities and contribute to the System Benefits Charge (SBC). Please check your farm’s current utility bills to see if your farm pays the SBC.

Energy Audit Options

You can request the level of energy audit that best fits your farm’s needs. NYSERDA will assign a Flexible Technical Assistance Program Consultant to visit your farm and perform an energy audit at no cost to you.

Level	Audit Activities	Type of Report that the Farm Receives
Level 1	Walk-through energy audit	Summary letter with limited evaluation of feasible energy efficiency measures
Level 2	Detailed energy audit	Energy audit report with calculated evaluations of appropriate energy efficiency measures including simple payback; meets ANSI/ASABE S612 standards
Level 3	Energy audit focused on specific systems, energy efficiency measures, or renewable energy	System-specific energy analysis report
